

Bluetooth® Headsets

Mono & Duo Models

VT MH100 Bluetooth Headset
Mono option only.

VT 9800 Bluetooth Headset
Mono & Duo options available.

In a world where every second counts, your headset shouldn't be the bottleneck. These Bluetooth devices are designed to support mobility, flexibility, and professional-grade performance—so you can take calls while moving between meetings, working from your desk, or checking inventory on the floor.

Designed with comfort, clarity, and productivity in mind, these Bluetooth headsets offer wireless freedom for professionals who depend on crystal-clear voice communications and seamless device integration. Whether you're in the office, at home, or on the go, these headsets ensure you stay connected with ESI's award-winning cloud communication tools.

ESI's Bluetooth headsets provide:

- Bluetooth connectivity allows flexibility for those who prefer not being tethered by a cord
- Excellent noise-cancelling microphones
- Designed for calls on the go, comfortable, ergonomic fit
- Wide-band audio for exceptional sound quality
- Wireless Range up to 100 feet
- Mute, volume up and down buttons
- Charges using USB C cable
- Compatible with Skype for Business, Microsoft Teams (when paired directly with computer)
