Enterprise Meetings – v2.6.341 - Release Notes

About the Release

Release Date	10 Apr 2025
Enterprise Meetings	V2.6.341

Upgrade Instructions

The server has been updated with new version. Simply close and re-open the app.

Improvements

Enhancements

- Past Call Summary UI Enhancement
    - Improved layout for better readability and accessibility across devices (desktop & mobile).
    - Meeting details now display start time, time zone, subject, duration, and date together.
    - AI Meeting Outline visible in mobile views and repositioned for better clarity.
    - Removed unnecessary information (dates, names, locations) to reduce clutter.
- Easier access to webinar panelist link from dashboard preview

Webinar hosts can now easily copy the panelist join link when previewing a webinar from the dashboard - making it simpler to invite additional panelists after scheduling.

Fixes

- Fixed: Attendees not visible before webinar broadcast starts
  Hosts can now see who is waiting to join a webinar before the broadcast begins. Previously, the attendee list showed "0" until the webinar started, even if participants were already waiting.

- Fixed: Participant removal during a live meeting caused display and audio issues
  Previously, if a participant was removed from a meeting or webinar while it was in progress, it could lead to ghost participants, missing video/audio, or chat errors - depending on who refreshed first. This has been resolved to ensure a stable experience when live meetings are edited.

- Fixed: 'Automatically Record' option shown on accounts without recording feature
  Users without access to the recording feature will no longer see the 'Automatically Record' dropdown when scheduling a call. This option now only appears for accounts that support recording.

Enterprise Meetings – v2.6.340 - Release Notes

About the Release

Release Date	27 Mar 2025
Enterprise Meetings	V2.6.340

Upgrade Instructions

The server has been updated with new version. Simply close and re-open the app.

Improvements

Enhancements

- Hide Timer on Narrow Viewports: On smaller screens (especially mobile), the in-call timer at the top of the screen is sometimes cut off. To improve usability, the timer will now be hidden on narrow viewports where space is limited.

- Improved Recording Layout UI: The recording layout selection in Settings and during a live call has been improved for better clarity and ease of use.

- Smart Summary Email Now Sent to More Meeting Participants: Previously, only the meeting organizer (host) received the smart summary email. Now, the email—including the AI-generated meeting outline—will also be sent to all attendees and invitees who belong to the same company as the host.

Fixes

- Sorting & Filtering Options for Host List: Previously filtering and sorting in the host list was not functioning correctly. Now it is possible to search and sort by role and department at the company and reseller levels.

Enterprise Meetings – v2.6.339 - Release Notes

About the Release

| Release Date	14 Mar 2025
Enterprise Meetings	V2.6.339

Upgrade Instructions

The server has been updated with new version. Simply close and re-open the app.

Improvements

Enhancements

- AI Meeting Outline: We've enhanced our existing Transcription feature with AI-generated meeting summaries! After a recorded meeting or webinar (that was transcribed) ends, a concise summary (100-300 words) is automatically created based on the transcript and key discussion points.

    - Where to Find It:

        - Available in the past meetings summary page.

        - Included in the 'smart summary' email sent to the host.

(Continued)

- Display All Contacts when user selects Contacts section in mobile app or browser.

- Improvements have been made to Enterprise Meetings video platform as a whole.

- The video camera default for each user has been changed from low resolution SD (360p; 480x360 pixels) to high resolution HD (720p; 1280x720 pixels). To see this change logout then back in to your Enterprise Meetings account. The ability for you to obtain this resolution is dependent upon the camera you're using. For example, if Enterprise Meetings video is set to HD but your camera can only reach 480p then Enterprise Meetings video will go up to 480p. Moving to a higher resolution by default will provide a crisper video experience.

0455-0390 Rev 2.6.341

Enterprise Meetings – v2.6.338 - Release Notes

About the Release

Release Date	27 Feb 2025
Enterprise Meetings	V2.6.338

Upgrade Instructions

The server has been updated with new version. Simply close and re-open the app.

Improvements

Enhancements

- Added an option to copy the webinar attendee link from in-call meeting details.
- Introduced a "waving" emoji to in-call reactions.

Fixes

- Fixed an issue where annotations sometimes appeared that could not be removed.
- Resolved a bug where mobile apps did not receive poll notifications until the options menu was opened.
- Scheduled webinars are now automatically added to the host's calendar.

Enterprise Meetings – v2.6.337- Release Notes

About the Release

Release Date	12 Feb 2025
Enterprise Meetings	V2.6.337

Upgrade Instructions

The server has been updated with new version. Simply close and re-open the app.

Improvements

Webinar Fixes

Polls:

Poll results are now included in the meeting summary.

The "Vote" button is disabled until a selection is made.

Fixed an issue where a spinner appeared on the moderator's poll creation screen if another moderator ended the poll.

Poll answers now use radio buttons instead of checkboxes.

Fixed duplicate toast notifications when a participant or panelist joins while a poll is active.

The "Change Vote" button is now disabled unless a selection is changed.

Polls now end automatically when a webinar is ended early.

Webinar Summary & Reporting:

The Attendees tab in the webinar summary is now hidden if the user is viewing the public link (i.e. they are not logged in).

Registration details, including attendee emails, are now included in the webinar attendee report.

The webinar summary now displays the total watch time for all attendees.

(Continued)

Participant & Panelist Views:

Webinar attendees can now see panelists in the "Participants" tab.

Webinar attendees are now ordered with "Watching" users at the top and "Registered" users at the bottom.
